

Hazardous waste disposal on demand

Collections for as little as £17 per month

HazTech Demand is designed for companies that need infrequent, un-scheduled collections of various types of hazardous waste.

When you are registered onto the service we only come to you when you request – or demand – a collection. And this can be only once a year if you like!

It's an easy way of dealing with all hazardous waste materials including oils, filters, batteries, solvents and other related items.

We provide you with correctly labelled containers and deal with all the necessary paperwork to ensure your total compliance.

You decide

At the start of the contract you decide:

- the types of waste you need to have collected
- the number of waste containers you require

It's as easy as that.

Our sales team uses a formula to work out the charges that depend on waste types, number of containers and your location. Up-front costs cover initial delivery to you of your waste containers plus the first quarter's rental charge. Quarterly direct debits then take care of ongoing container rental.

Collection and disposal charges are only invoiced after each requested collection.

Minimum total contract charges of £200 per year apply.

To get an exact cost, for more information or to set up a collection contract, call our sales team now on 0870 2401 055.

Flexible approach

The HazTech Demand service is also flexible enough to be adapted whenever your needs change.

If your business produces more waste or different waste types than you were expecting we can either provide additional containers or convert your account to our HazTech Schedule service. Just call OSS customer services.

Note. It is illegal to mix different types of hazardous waste materials or mix with non hazardous waste. The disposal charges apply to the collection of correctly segregated wastes stored in OSS supplied containers and drums. Mixed wastes will incur additional disposal charges.
