Environmental Policy Statement

Our General Statement of Principles

As a specialist waste management service provider, OSS Group Ltd will strive to attain sector-leading standards during the undertaking of its business and seek to manage the wastes of others with minimal environmental impact.

In our manufacturing activities also, we will endeavour to operate to the highest standards of environmental protection possible, ensuring that our products are managed responsibly throughout their life cycle from recovery to re-use disposal.

Our Policy Objectives

- To identify, quantify and control any environmental impacts arising from the activities at our company facilities, as well as during the recovery of wastes from our customers and the transportation of materials to and from our facilities.
- To progressively reduce these impacts wherever possible using best available techniques and meet or exceed relevant statutory requirements, by employing a formal system of regular audit and review of performance.
- To set and maintain operating standards as a benchmark for others in our business sector and to encourage their adoption.
- To pay due regard to the nature of the primary waste streams managed by the Group and to explore and develop innovative means of reducing the impact of their disposal.
- In order to achieve our objectives, we will maintain an accredited Environmental Management System and conduct our activities in strict compliance with it.
